July 1986**

JULY 1986

This publication is issued annually in July to show retail electricity rates and selected bills for customers of Ontario Hydro and associated Municipal Utilities.

Section 1 states the most commonly used retail rates of each of the 316 municipal utilities, as well as the rates for Ontario Hydro's Retail System.

Section 2 contains graphs depicting the trends and the distributions of comparative bills. This section also contains the tables of comparative bills.

Before using data from this report, the user should read the Explanatory Notes, which precede each section, to become familiar with the contents of the tables.

Section 1

- ° 279 utilities had rate changes from July 1, 1985 to July 1, 1986.
- ° Rates other than those contained in Tables 1 to 4 may also be available in any of the utilities listed and inquiries regarding these should be made directly to the utility concerned.
- ° All utilities are listed in Tables 1 and 2.
- ° Utilities with Commercial-Industrial rates are listed in Table 3.
- ° Utilities with rates applicable to General Customers Over 5000 kW and Ontario Hydro's (Directs) rates are shown on Table 4.
- ° All rates are quoted in the net amount and are those in effect July 1, 1986.

- ° Graph 1 presents trends in the average bills of the residential rate class for low and medium energy use. Graph 2 presents the trend in the residential class end rate ¢ per kW.h. This trend represents the average end rate of the 316 municipalities, each weighted by its customers in the residential class.
- ° Graphs 3 to 16 show distributions of the 316 municipalities according to the bill size for each of the comparative bills reported. The median is defined as the value for the middle utility, ie., 50 per cent of the utilities have a value greater than the median, and 50 per cent a value lower. The average is the arithmetic average of the comparative bills of the 316 municipal utilities. The weighted average is obtained by multiplying the comparative bill of each of the 316 municipal utilities by its customers in the rate class, and dividing the sum of these weighted bills by the total number of customers in the rate class.
- ° The calculated bills shown in Tables 1 and 2 are based on rates contained in Section 1.
- ° There are no bill comparisons for the General Over 5000 kW classification.

JULY 1987

This publication is issued annually in July to show retail electricity rates and selected bills for customers of Ontario Hydro and associated Municipal Utilities.

Section 1 states the most commonly used retail rates of each of the 316 municipal utilities, as well as the rates for Ontario Hydro's Retail System.

Section 2 contains graphs depicting the trends and the distributions of comparative bills. This section also contains the tables of comparative bills.

Before using data from this report, the user should read the Explanatory Notes, which precede each section, to become familiar with the contents of the tables.

Section 2

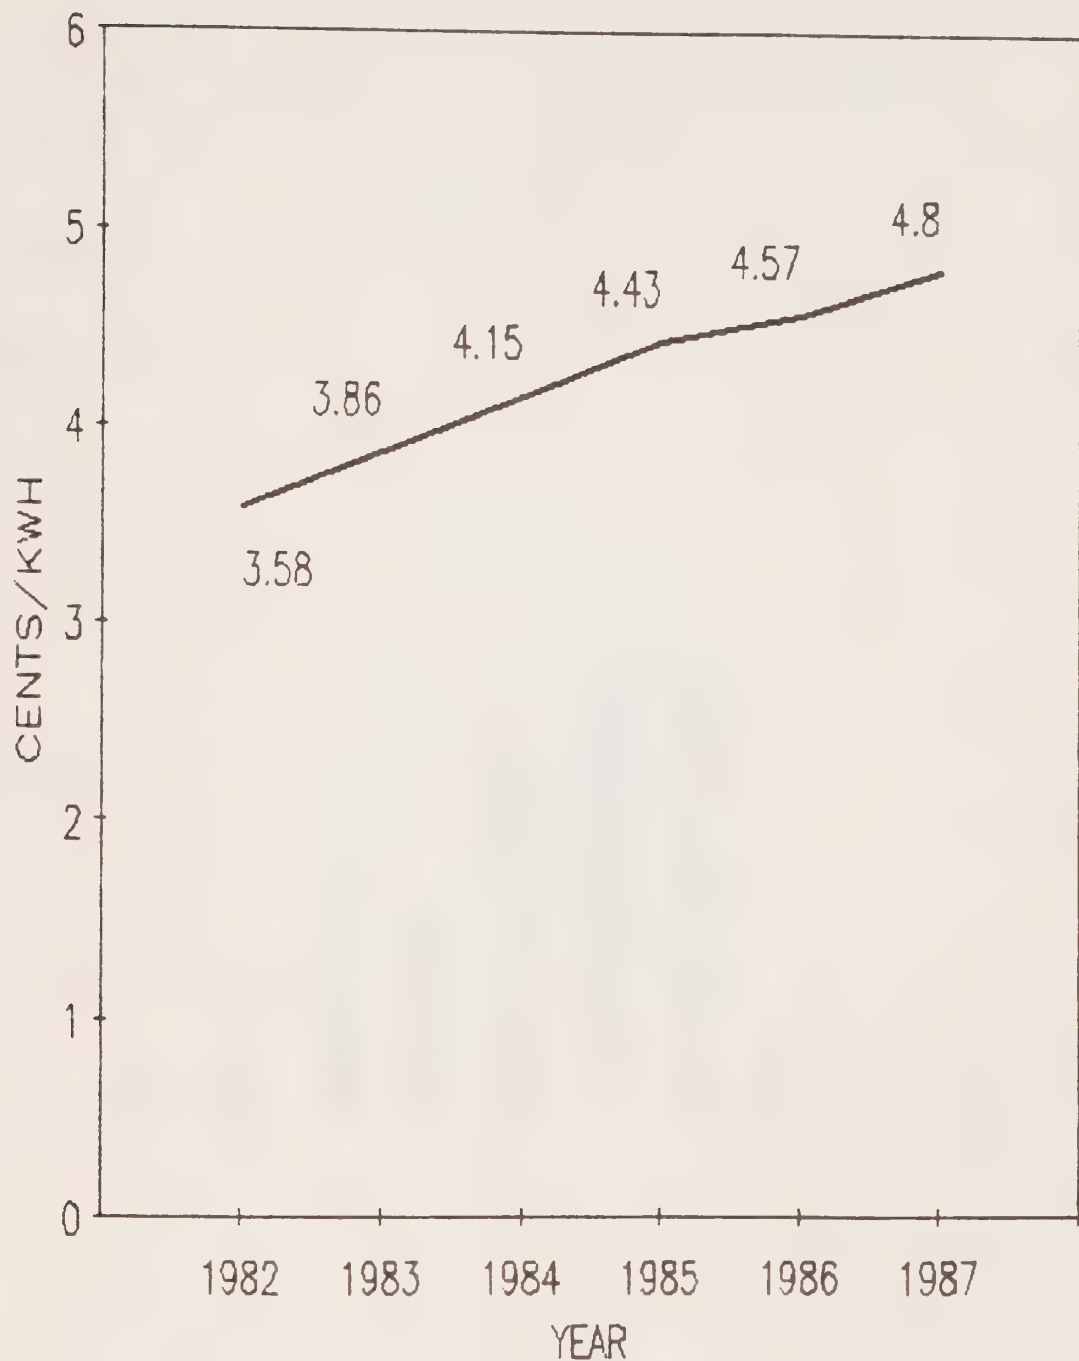

- ° Graph 1 presents trends in the average bills of the residential rate class for low and medium energy use. Graph 2 presents the trend in the residential class end rate ¢ per kW.h. This trend represents the average end rate of the 316 municipalities, each weighted by its customers in the residential class.
- ° Graphs 3 to 16 show distributions of the 316 municipalities according to the bill size for each of the comparative bills reported. The median is defined as the value for the middle utility, ie., 50 per cent of the utilities have a value greater than the median, and 50 per cent a value lower. The average is the arithmetic average of the comparative bills of the 316 municipal utilities. The weighted average is obtained by multiplying the comparative bill of each of the 316 municipal utilities by its customers in the rate class, and dividing the sum of these weighted bills by the total number of customers in the rate class.
- ° The calculated bills shown in Tables 1 and 2 are based on rates contained in Section 1.
- ° There are no bill comparisons for the General Over 5000 kW classification.

FOREWORD

MONTHLY RATES
AND COMPARATIVE BILLS
ONTARIO HYDRO
AND ASSOCIATED
MUNICIPAL UTILITIES

JULY 1988

This publication is issued annually in July to show retail electricity rates and selected bills for customers of Ontario Hydro and associated Municipal Utilities.

Section 1 states the most commonly used retail rates of each of the 316 municipal utilities, as well as the rates for Ontario Hydro's Retail System.

Section 2 contains graphs depicting the trends and the distributions of comparative bills. This section also contains the tables of comparative bills.

Before using data from this report, the user should read the Explanatory Notes, which precede each section, to become familiar with the contents of the tables.

MONTHLY RATES AND COMPARATIVE BILLS ONTARIO HYDRO AND ASSOCIATED MUNICIPAL UTILITIES

JULY 1988

Section 2

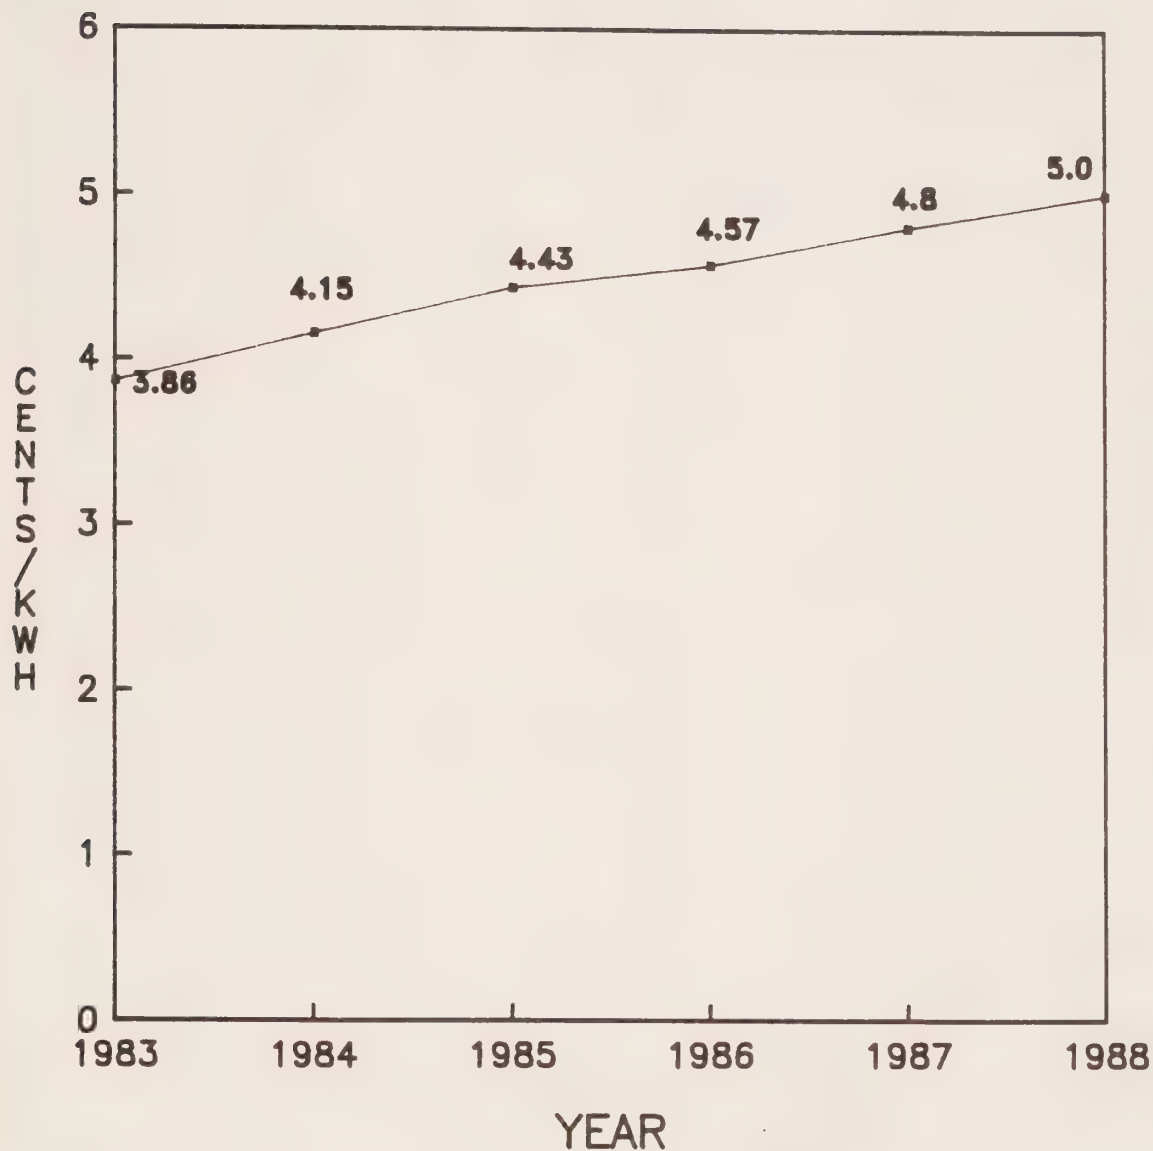

- ° Graph 1 presents trends in the average bills of the residential rate class for low and medium energy use. Graph 2 presents the trend in the residential class end rate ¢ per kW.h. This trend represents the average end rate of the 316 municipalities, each weighted by its customers in the residential class.
- ° Graphs 3 to 16 show distributions of the 316 municipalities according to the bill size for each of the comparative bills reported. The median is defined as the value for the middle utility, ie., 50 per cent of the utilities have a value greater than the median, and 50 per cent a value lower. The average is the arithmetic average of the comparative bills of the 316 municipal utilities. The weighted average is obtained by multiplying the comparative bill of each of the 316 municipal utilities by its customers in the rate class, and dividing the sum of these weighted bills by the total number of customers in the rate class.
- ° The calculated bills shown in Tables 1 and 2 are based on rates contained in Section 1.
- ° There are no bill comparisons for the General Over 5000 kW classification.

FOREWORD

MONTHLY RATES AND COMPARATIVE BILLS ONTARIO HYDRO AND ASSOCIATED MUNICIPAL UTILITIES

AUGUST 1989

This publication is issued annually to show retail electricity rates and selected bills for customers of Ontario Hydro and associated Municipal Utilities.

Section 1 states the most commonly used retail rates of each of the 315 municipal utilities, as well as the rates for Ontario Hydro's Retail System.

Section 2 contains graphs depicting the trends and the distributions of comparative bills. This section also contains the tables of comparative bills.

Before using data from this report, the user should read the Explanatory Notes, which precede each section, to become familiar with the contents of the tables.

EXPLANATORY NOTES

MONTHLY RATES AND COMPARATIVE BILLS ONTARIO HYDRO AND ASSOCIATED MUNICIPAL UTILITIES

AUGUST 1989

Section 2

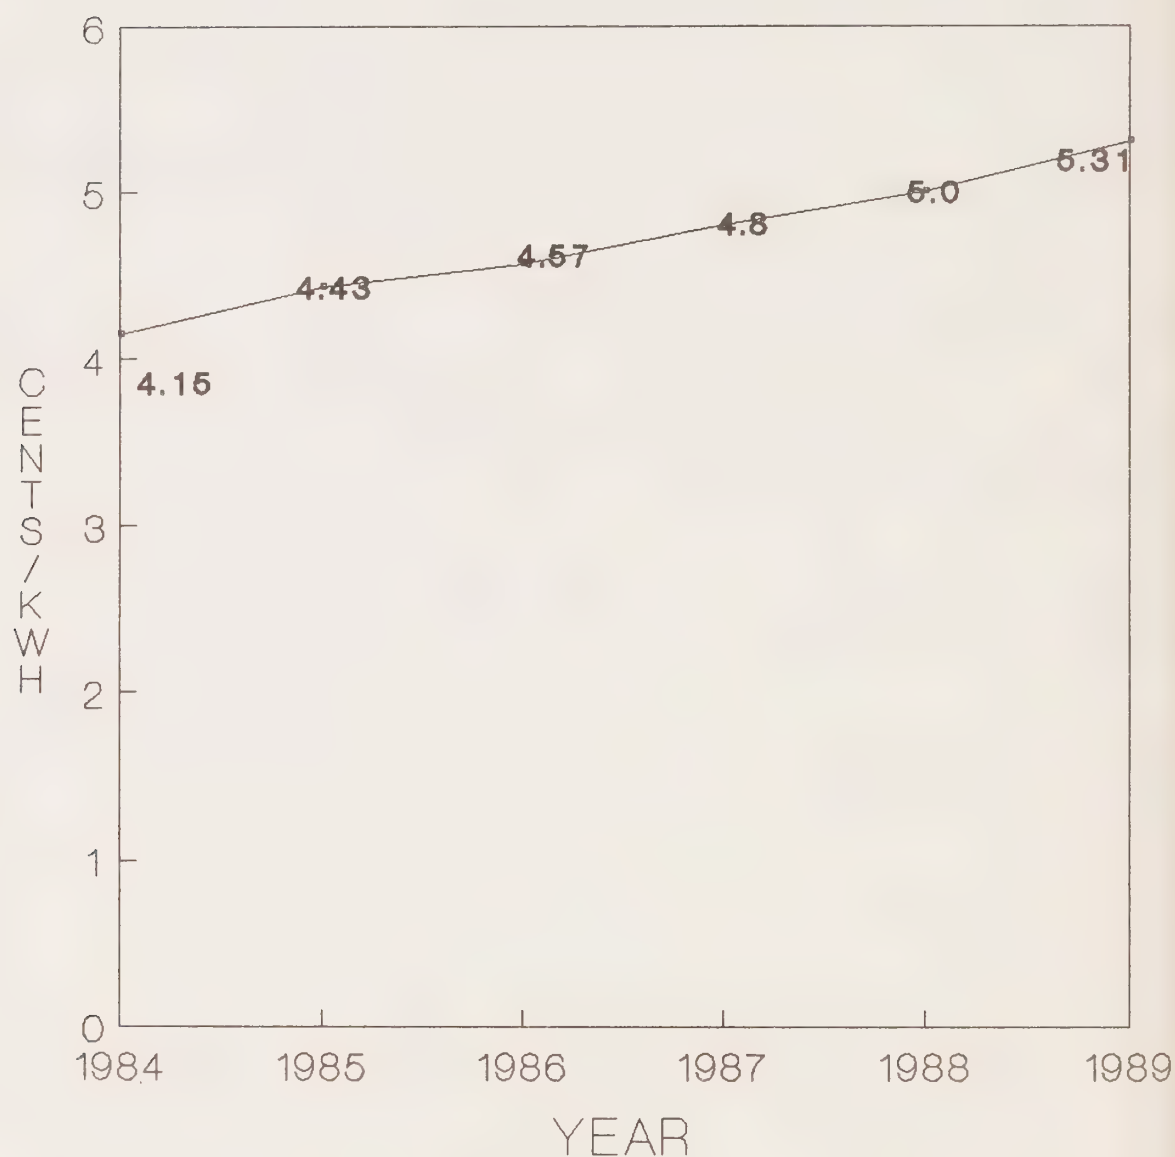

- ° Graph 1 presents trends in the average bills of the residential rate class for low and medium energy use. Graph 2 presents the trend in the residential class end rate ¢ per kW.h. This trend represents the average end rate of the 315 municipalities, each weighted by its customers in the residential class.
- ° Graphs 3 to 16 show distributions of the 315 municipalities according to the bill size for each of the comparative bills reported. The median is defined as the value for the middle utility, ie., 50 per cent of the utilities have a value greater than the median, and 50 per cent a value lower. The average is the arithmetic average of the comparative bills of the 315 municipal utilities. The weighted average is obtained by multiplying the comparative bill of each of the 315 municipal utilities by its customers in the rate class, and dividing the sum of these weighted bills by the total number of customers in the rate class.
- ° The calculated bills shown in Tables 1 and 2 are based on rates contained in Section 1.
- ° There are no bill comparisons for the General Over 5000 kW classification on Time-Of-Use Rates.
